Installation and setup

Installation

Step 1: Add cartridge to cartridge path

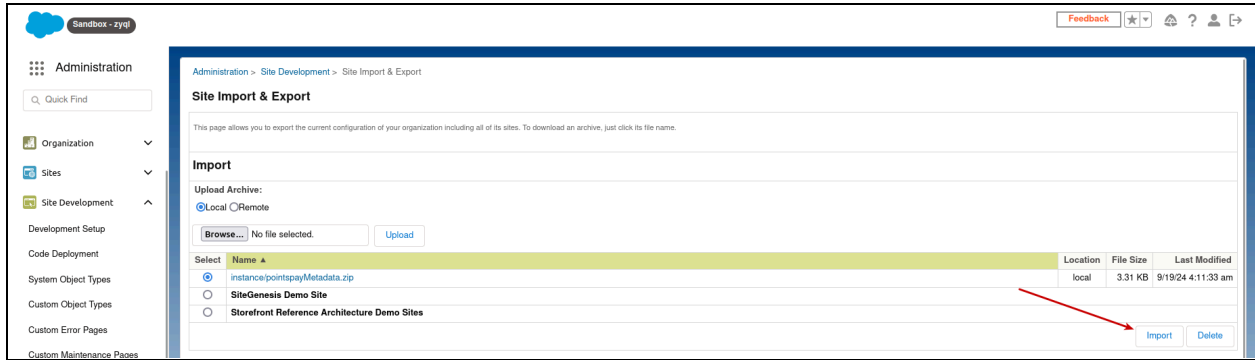

Upload the cartridge pointspay_sfra into your sandbox updating the cartridge path. To do so, go to **Business Manager > Administration > Sites > Manage Sites > Your Target Site > Settings** and insert pointspay_sfra before your cartridges record. Please also make sure to include the app_storefront_base cartridge which is the root SFCC cartridge required for all others to work.

Click apply and verify that the pointspay_sfra cartridge is displayed in the Effective Cartridge Path.

Step 2: Import metadata archive

Upload and import pointspayMetadata.zip from the cartridge metadata folder, which includes definitions for payment providers, methods and custom configurations. To do so, go to **Business Manager > Administration > Site Development > Site Import & Export**. Upload archive using Local option in the Upload Archive section. Make sure to change the name of the "RefArch" folder to the name of the site you want to upload this to. After upload choose pointspayMetadata.zip in the list and click on the Import button.

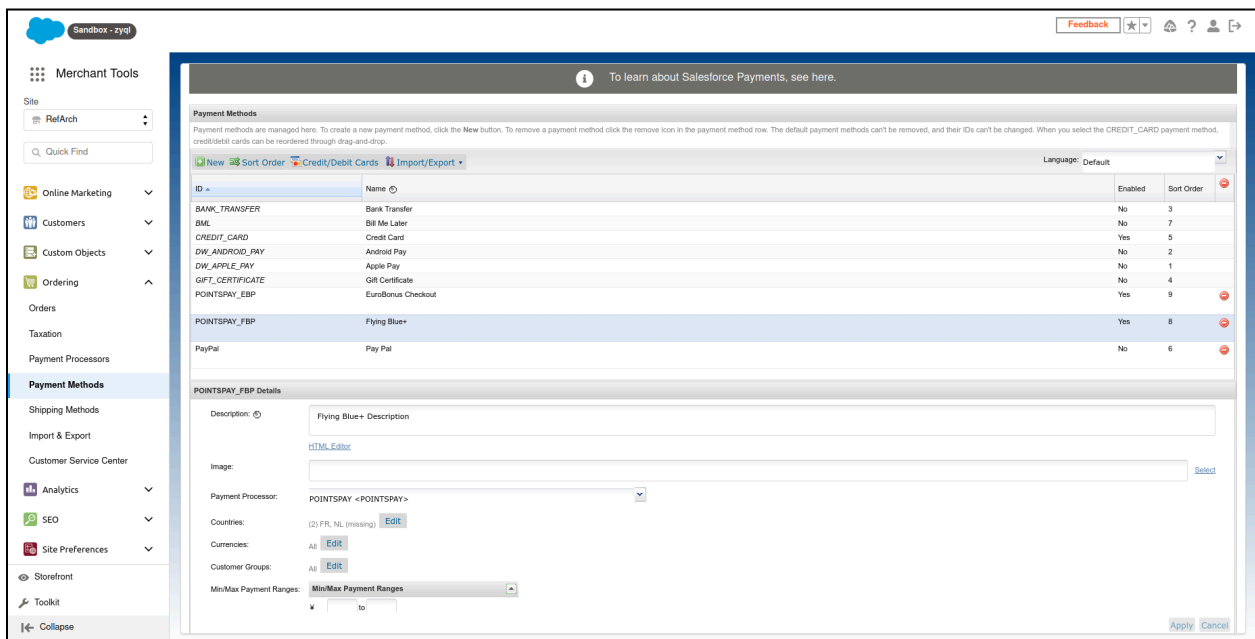

Make sure to verify the status of the import once it completes.

Status				
Select All	Process	Start	Duration	Status
<input type="checkbox"/>	Site Import (pointspay/Metadata.zip)	9/19/24 4:11:44 am	00:00:00	Success
<input type="button" value="Refresh"/> <input type="button" value="Delete"/>				
Showing 1 - 1 of 1 items				

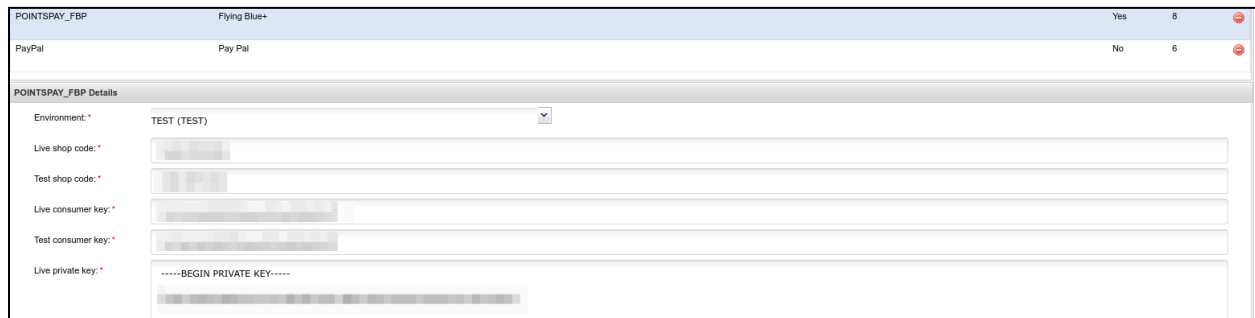

Payment flavor configuration

After successfully adding the cartridge to the cartridge path and uploading the metadata files, available Pointspay payment flavors will be shown in the list of payment methods, available at **Business Manager > Merchant Tools > Ordering > Payment Methods**.

From here, you can configure the native Salesforce configuration options, such as name, description, supported countries, currencies and customer groups for each of the Pointspay payment flavors, as well as define some amount conditions for which you want to display these flavors for.

In addition to that, there are also custom Pointspay configurations that are required in order to display these flavors on the Salesforce B2C storefront. These are available within the “Pointspay” section of the payment method configuration page.

Pointspay configuration consists of the following environment-specific fields:

- **Shop code** - text field
- **Consumer key** - text field
- **Private key** - textarea field (value used for signing payment requests to the Pointspay API)
- **Pointspay public key** - textarea field (value used for verifying incoming requests from the Pointspay API)
- **Debug mode** - toggle field where merchants can select whether to switch the debug mode on or off

Displaying payment flavors on the storefront

After configuring the Pointspay payment flavors, once customers add products to their cart and enter their shipping and billing information, they will be presented with Pointspay payment flavors among available payment options in the billing section of the checkout page.

Order management

After an order paid using one of Pointspay payment flavors has been created, merchants can review it by going to **Business Manager > Merchant Tools > Ordering > Orders** and searching for it by its ID.

The screenshot shows the 'Orders' page within the 'Merchant Tools > Ordering' section. The left sidebar contains a 'Merchant Tools' menu with options like Site, Content, Search, Online Marketing, Customers, Custom Objects, Ordering, Orders, Taxation, Payment Processors, Payment Methods, Shipping Methods, Import & Export, Customer Service Center, Analytics, Storefront, Toolkit, and Collapse. The main content area is titled 'Orders' and includes a search bar with the text 'Order Number: 00001195' and a 'Find' button. Below the search bar is a table with columns: Number, Order Date, Site, Created By, Registration Status, Customer, Email, Total, and Status. The table contains one row with the following data: Number: 00001195, Order Date: 9/20/24 3:12:36 pm Etc/UTC, Site: RelArch, Created By: Customer, Registration Status: Registered, Customer: John Doe, Email: risto.kekovic@logecom.com, Total: \$81.89, and Status: New. A 'Cancel Orders' button is located at the bottom right of the table.

Number	Order Date	Site	Created By	Registration Status	Customer	Email	Total	Status
00001195	9/20/24 3:12:36 pm Etc/UTC	RelArch	Customer	Registered	John Doe	risto.kekovic@logecom.com	\$81.89	New

On the payment tab, they can review the current status of the payment, as well as the selected payment flavor and amount.
